NOTICE OF VACANCY

Full-time Industrial Art and Career Technical Education Teacher –

If you see a few pieces of wood, some glue, and some wire, do you look for a trash can to throw it away or does your mind start racing on what you can have your students build with it? When you see a 9th grader sketching in his/her note book do you walk by or stop and inquire what they are drawing, and then envision how that could manifest into a 3D printed application through computer animated design? When you see the old hotrod on the side of the street in need of repair, do you think of your students' team ability of restorative application as a perfect suiting of opportunity?

If your answers involve “building”, “what are you drawing?”, and “envisioning opportunities for student engagement”, then keep reading about this opportunity to join a like-minded team of educators, role models, and mentors for students.

The Hancock Central High & Middle School education team is looking to add one unique Industrial Art and Career Technical Education teacher to lead our student pathways in our one of a kind (world class) dedicated wood, metal, CAD/CAM and manufacturing lab spaces. Special consideration will be given to those with CTE certification and/or multiple certifications within building trades, manufacturing technologies, science and/or technology (including coding & robotics). If you want to be part of our team, please apply.

We are looking for Michigan Certified Instructors, but are willing to work with the right candidate working towards obtaining their certification.

We plan to fill the position as soon as we find the right candidates and will begin interviewing immediately. The position will start in the 2024-25 school year.

Apply to: Chris M Salani, Superintendent
